

Renewable Energy

As renewable energy providers, this forward thinking business began working with CHBC in 2016, and have continued to reap the rewards of that decision to this day.

Project Undertaken

As a firm looking to the future, this renewable energy provider drew parallels with the outsourced FD services offered by the team at CBHC. This mutual belief of forward thinking services/products in our respective industries allowed us to act in a financial advisory position, whilst simultaneously provide accurate accounting support at a very short notice. The strong working relationship between ourselves and the energy firm enabled all accounting records to be brought up to date for 28 revenue generating companies; each one formed to install solar energy solutions, handling contracts from residential properties to the MOD.

Realised Benefit

With CBHC's input the firm avoided the need to recruit in house and expensive accounting staff who may have lacked the necessary skills nor the capacity to focus on one specific task. Further to this, Statutory Accounts were completed in a cost effective and timely manner once all accounting controls and entries were up to date.
